PROFESSIONAL SUMMARY

2nd-year B.Tech Computer Science student (2024–2028) with proven experience building production-ready full-stack web applications using the MERN stack and integrating AI APIs. Developed real-world projects including an AI-powered code reviewer and a full-featured job portal. Skilled in RESTful API design, MVC architecture, and Python automation. Actively solved 200+ DSA problems on Striver's SDE Sheet. Seeking an internship to contribute, learn, and grow in a fast-paced engineering team.

TECHNICAL SKILLS

Languages	C, C++, Python, JavaScript (ES6+)
Frontend	React.js, HTML5, CSS3, Tailwind CSS, GSAP, Framer Motion, Monaco Editor
Backend	Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture
Database	MongoDB, MySQL
AI & APIs	Google Gemini API, Web Speech API
Tools	Git, GitHub, Docker, Postman, VS Code

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

2024 – 2028

B.Tech in Computer Science | Bareilly, UP

PROJECTS

Job Portal [GitHub ↗](#)

React.js · Node.js · Express.js · MongoDB · JWT · Tailwind CSS

- Built a full-stack job portal with separate dashboards for recruiters and job seekers, featuring job posting, browsing, and one-click application functionality.
- Implemented secure JWT-based authentication with role-based access control (Admin, Recruiter, Applicant) to protect routes and manage user permissions.
- Developed RESTful APIs for job CRUD operations, user profile management, and application tracking using Node.js, Express.js, and MongoDB.

AI Code Reviewer [Live Demo ↗](#)

React.js · Monaco Editor · Node.js · Express.js · Google Gemini 2.5 Flash · Docker

- Engineered a full-stack AI-powered code review platform with a resizable split-panel interface using React and Monaco Editor (VS Code engine), delivering a professional IDE-like experience.
- Integrated Google Gemini 2.5 Flash API with a custom system prompt to simulate a Senior Code Reviewer, providing feedback on code quality, security, and performance.
- Architected backend with Node.js + Express.js using strict MVC pattern (routes → controllers → services) for clean separation of concerns and scalability.

Real-time Collaborative Editor [Live Demo](#)

React.js · Node.js · Express.js · Socket.io · Docker

- Built a real-time collaborative code editor enabling multiple users to write and edit code simultaneously, with changes reflected instantly across all connected clients.
- Implemented WebSocket-based live synchronization using Socket.io for low-latency bi-directional communication between users.
- Containerized the full application using Docker for consistent development and deployment environments.

ACHIEVEMENTS & ACTIVITIES

- Solved 200+ DSA problems from Striver's SDE Sheet covering arrays, strings, DP, trees, and graphs.
- Completed MERN Stack Development course covering full project lifecycle from design to deployment.
- Active GitHub contributor with 10+ repositories showcasing personal and academic projects.
